

Terry Stops/ Stop, Search, and Frisk

Orangel Mendez

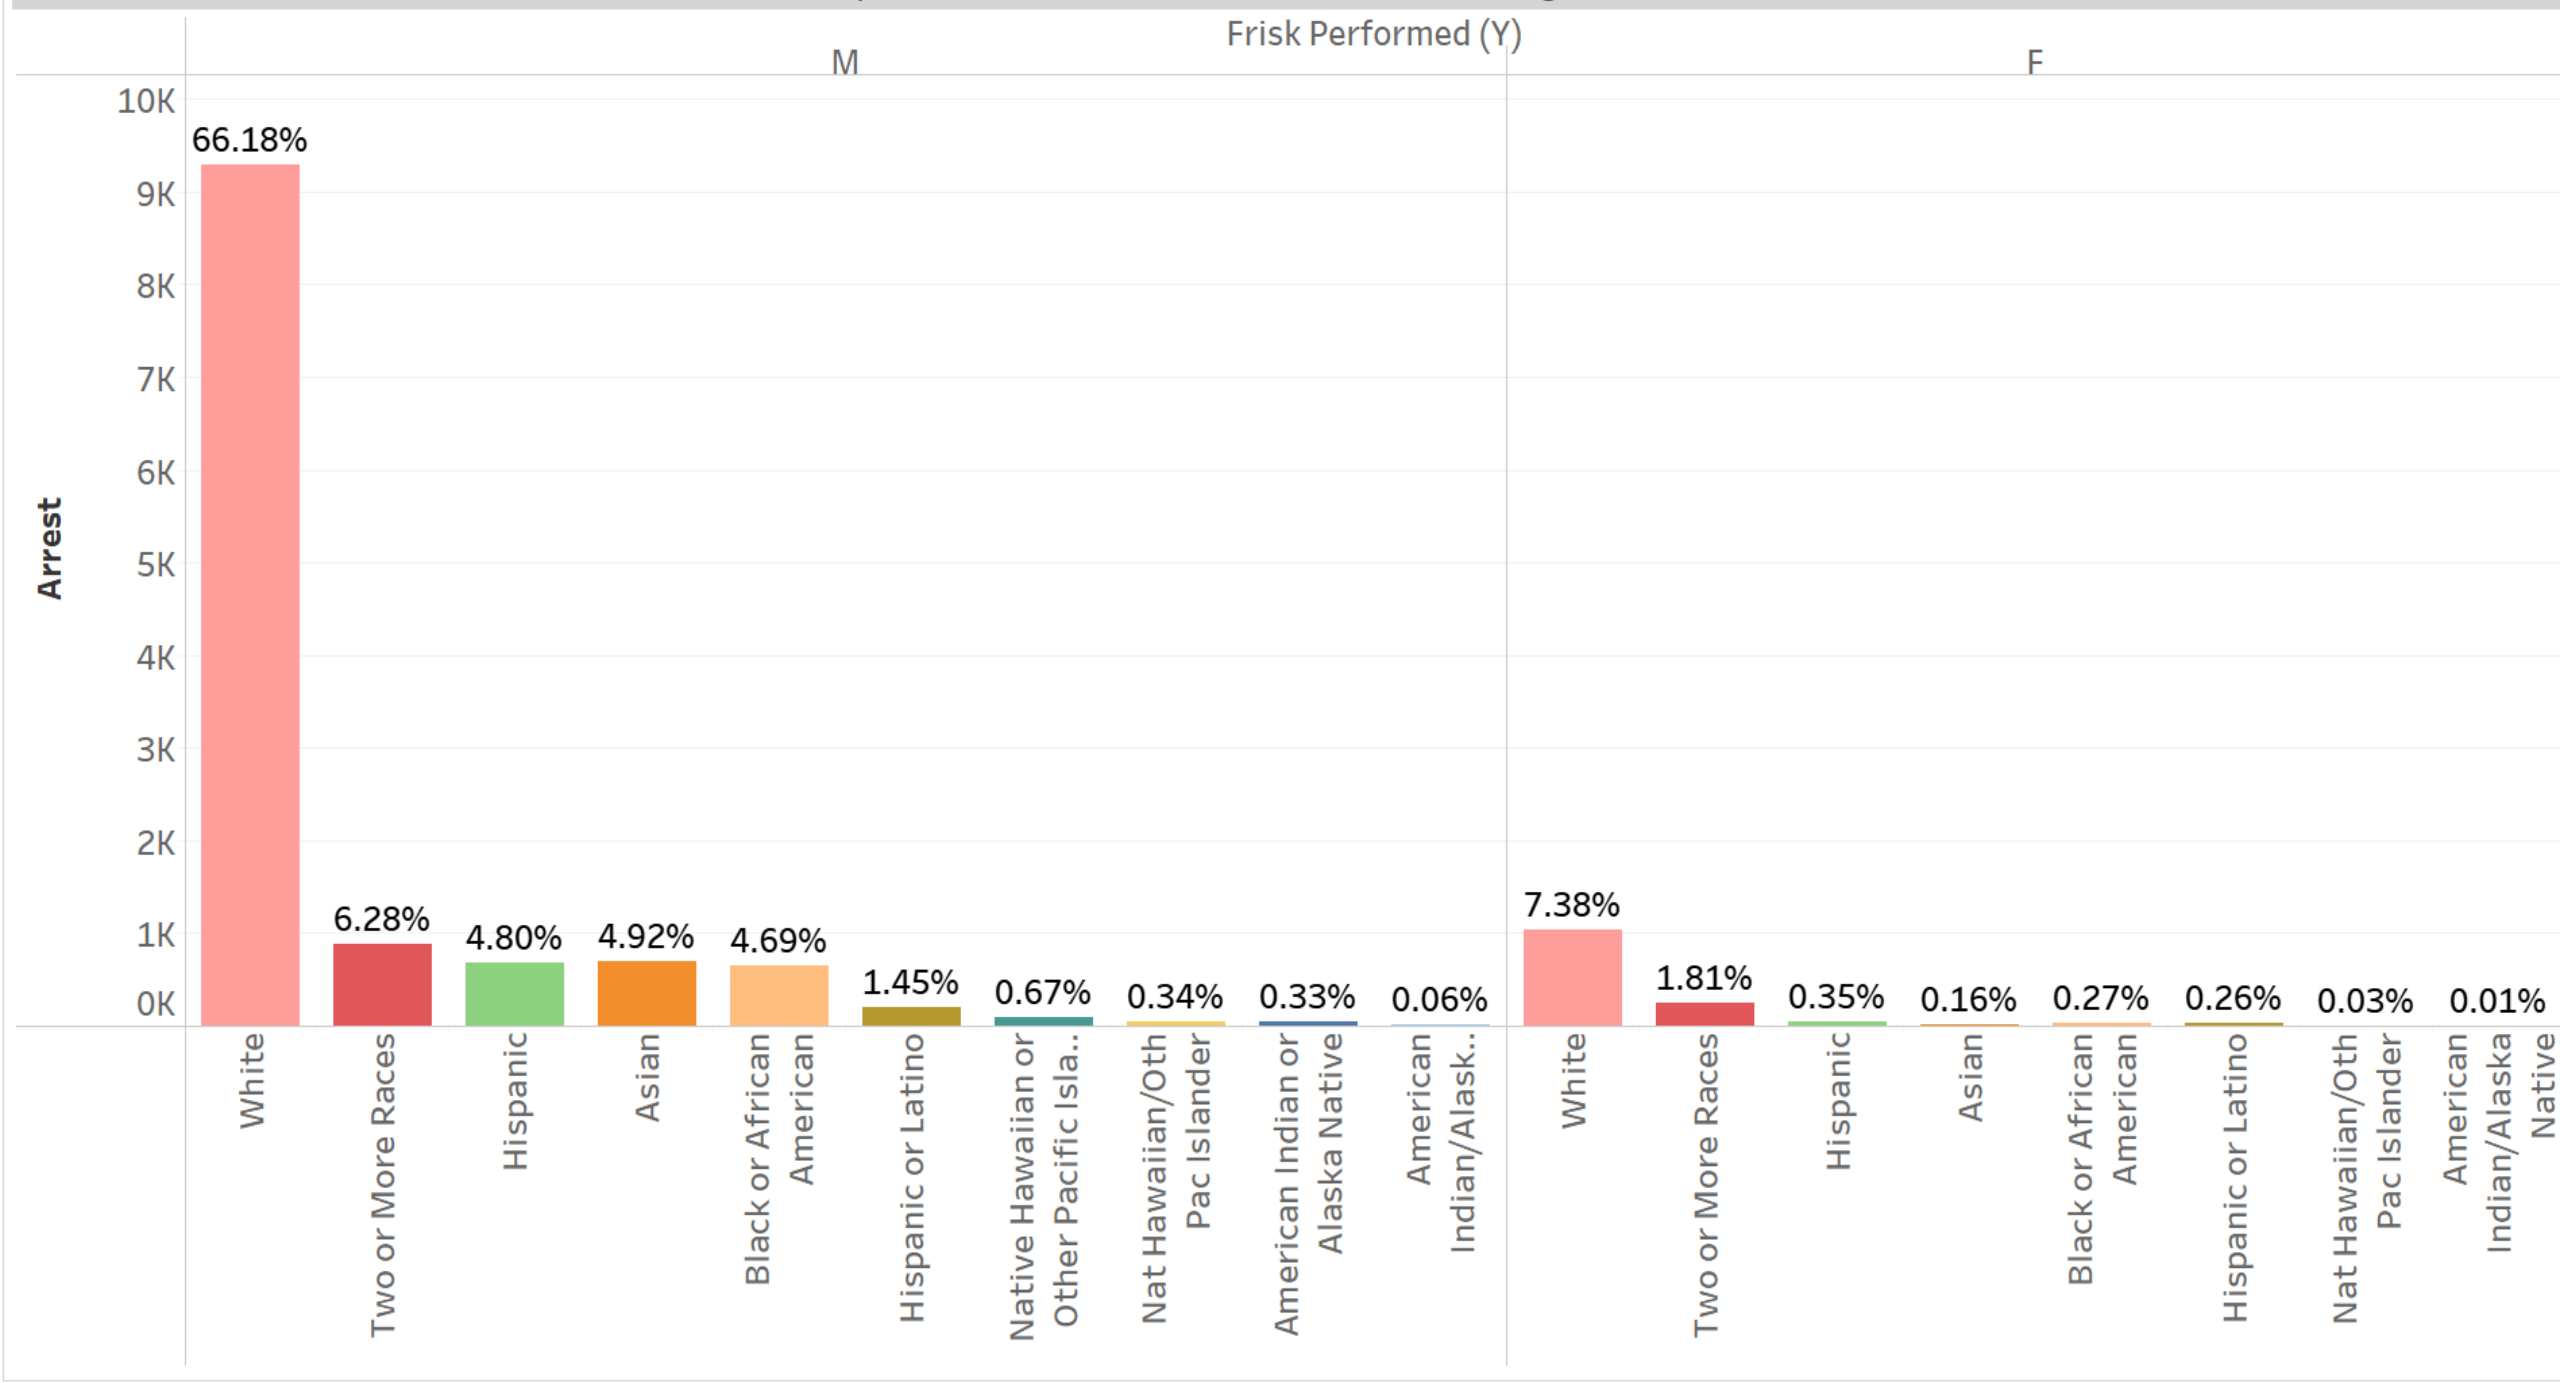

Business Problem

- Analyze data from Terry stops in Seattle and NYC
- Determine best predictors that lead to arrests from a Terry stop
- Make recommendations to improve the outcome

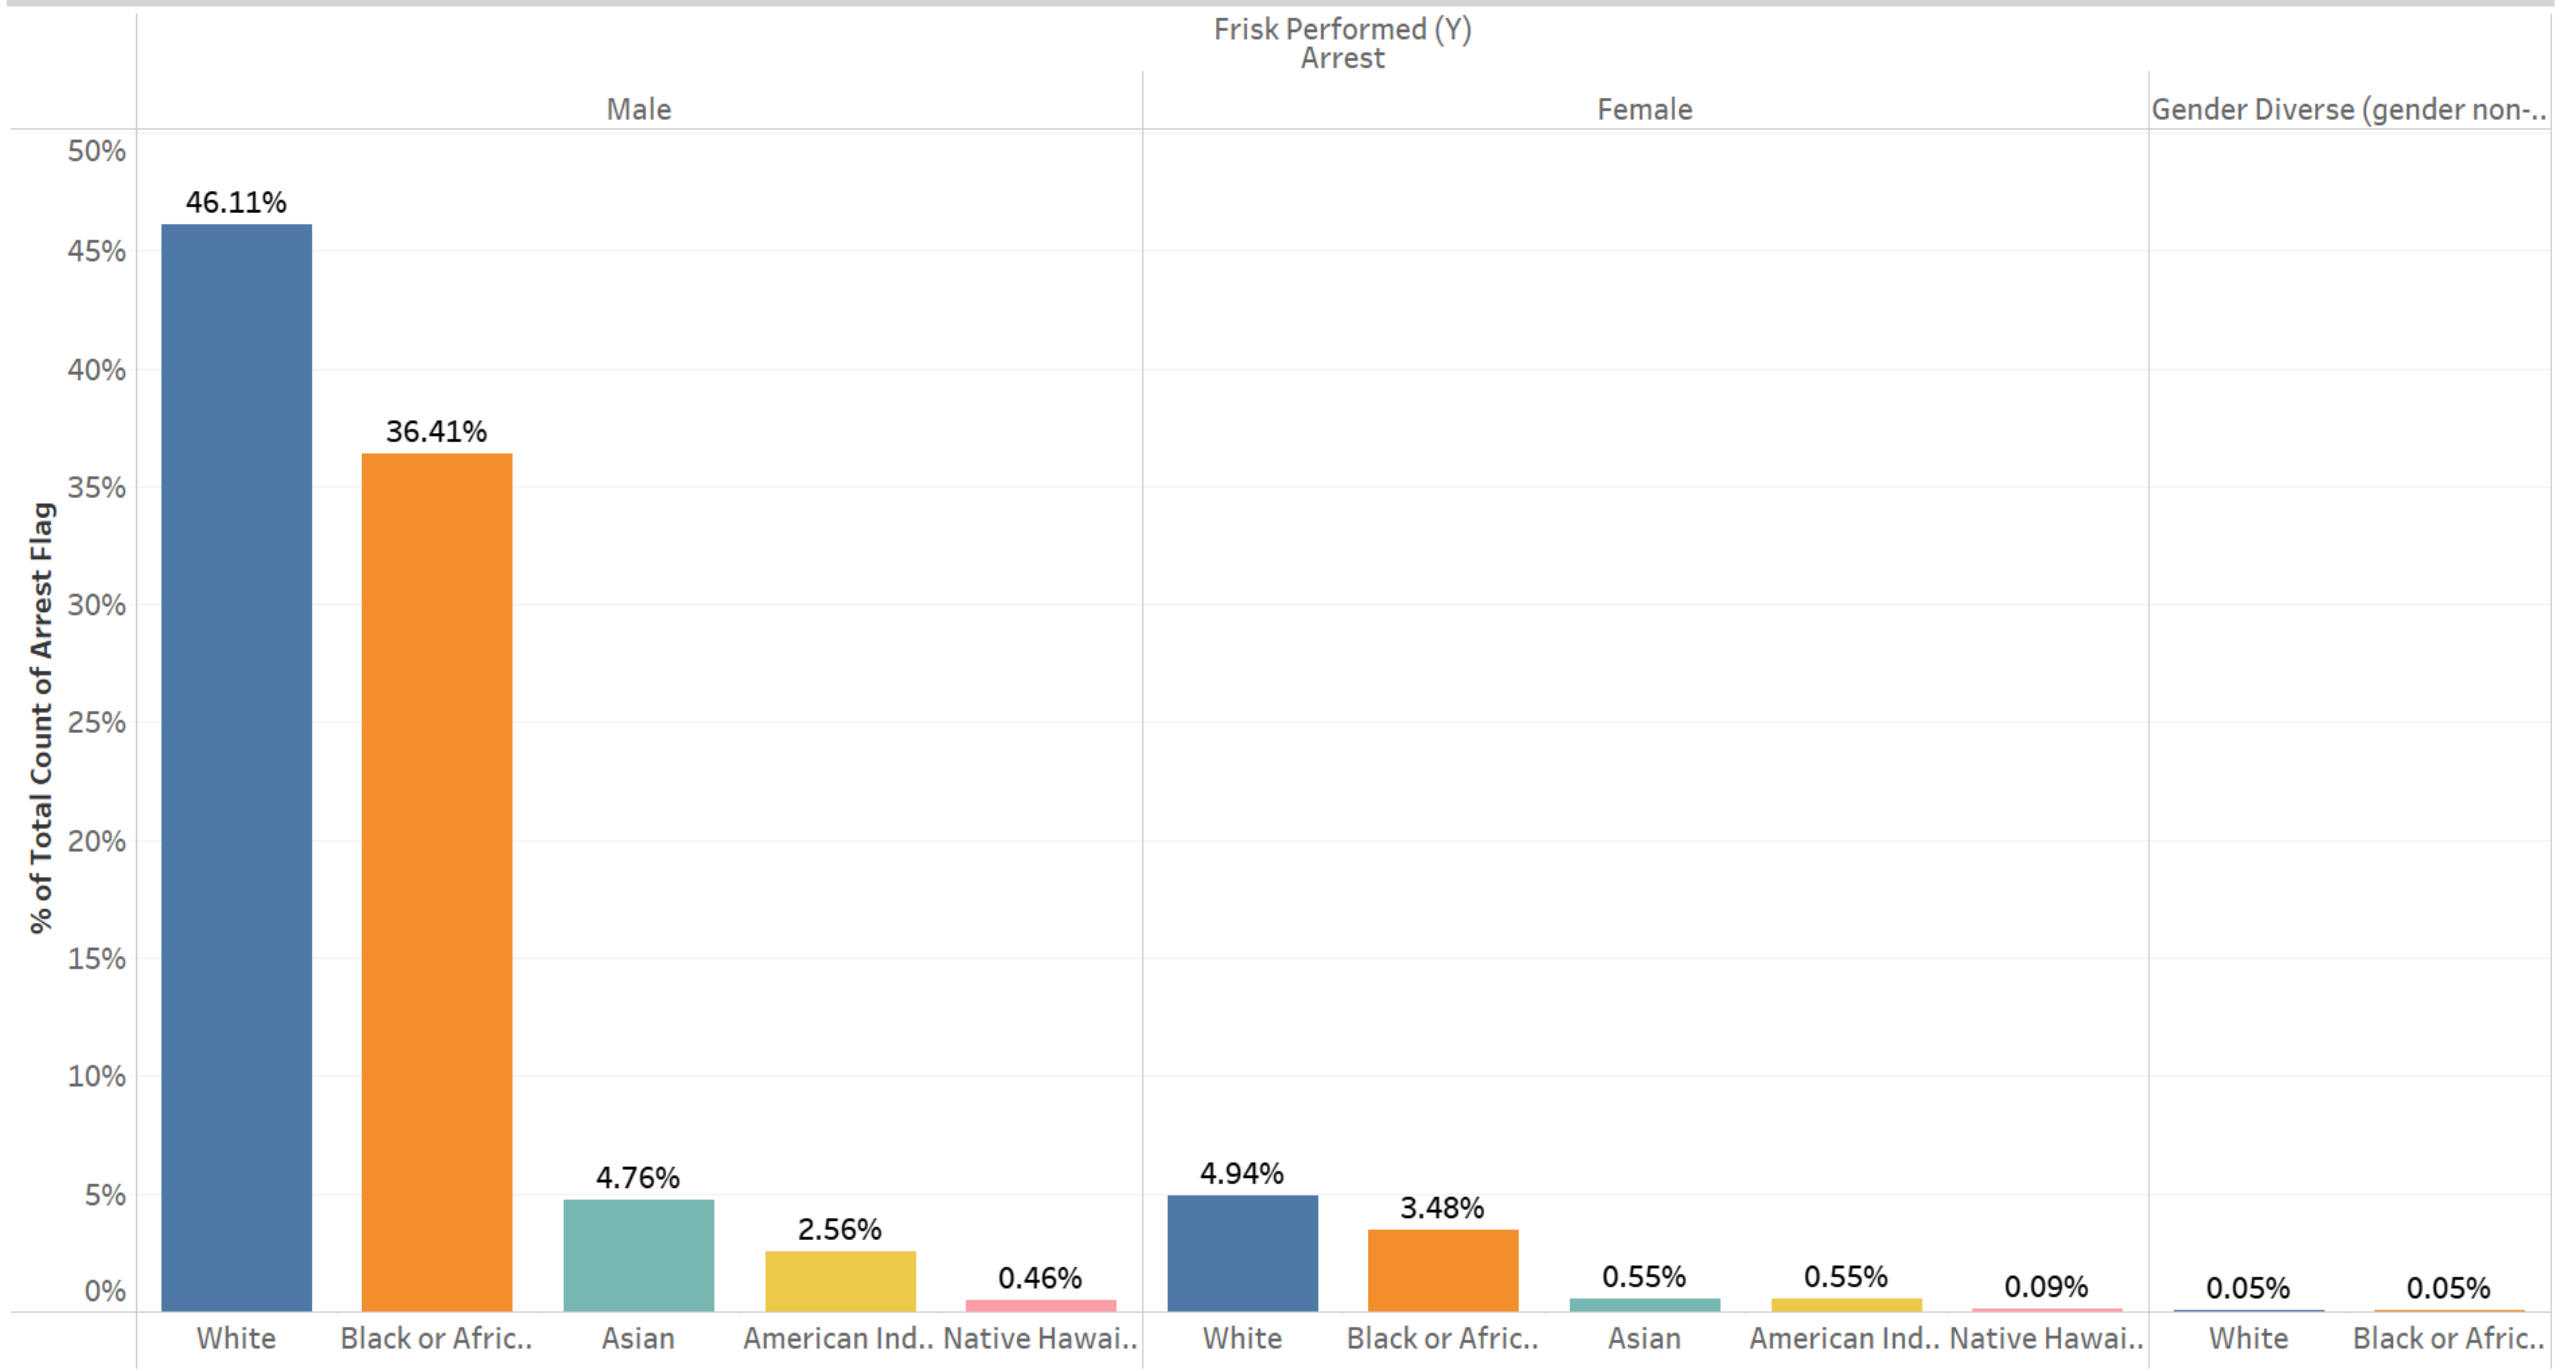

Arrests Recorded based on frisk performed

% of frisks performed and arrest made based on officer gender and officer race

Arrest made by gender, race, and if frisk were performed

Next Steps:

- Conduct fairness evaluations to identify and address potential biases such as race and gender.
- Change training programs, adjustments to stop-and-frisk policies, or refining guidelines to reduce bias while enhancing public safety.
 - Test the model in a real-world pilot program to validate its effectiveness and identify areas for improvement.

Conclusion

Terry Stops performed in Seattle:

Frisk included/arrest:

white males, and black/African-American males.

Followed by White females and Asian males.
